NOTE: blank cells indicate data not available or (in the case of rankings) indicate that the school was not qualified to be ranked by U.S. News and World Report. For example, schools below the 25th percentile have their scores concealed by US News & World Report who simply report the entire bottom quartile's ranking range. We elected not to show that range here because it's not specific enough to be meaningful in our data. Schools without a grade 12 or with very small enrollment are simply displayed as Unranked by US News & World Report and not shown here.

NOTE: high schools that did not provide data for this report are not listed here.

Comparing Ranking Data (proficiencies & college-ready index) with Florida DOE school grades

The main purpose for sharing this data is to point out the obvious disconnect when you compare nationally-normed high school ranking data (reading proficiency, math proficiency and college-ready index) with the Florida DOE "report card" grades which are calculated using a FL DOE proprietary formula. This proprietary grading formula was created by and can be manipulated by the FL DOE. By grading on the low "curve", the school grades can be made to look much better than is actually the case. So don't take it at face value when your school claims to be an "A" school (for example). Look at the U.S. News and World Report data and see if it supports the claim. We need visibility into the TRUE academic performance of Florida schools. Moving away from the highly manipulated FL DOE proprietary grading system is a MUST if we're to effectively judge the efficiency of Florida Schools.
